

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country voyage in their RV. Freshly retired, after spending several years working with his brother to manufacture their crane business into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

While on their journey, John spent time conversing with former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a vast marketplace for a product that could quickly and safely elevate individuals in the air to accomplish maintenance and other construction functions.

Following their return from holiday, John set up a joint venture with two of his friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design elements of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the company has extended itself into several international markets and continues to cultivate innovative machinery to ensure that consumers are able to become safer and more resourceful within their workplace.
